Travel the Dolomites on the route of the legendary "Great Dolomites Tour". Your guide will take you on an exciting voyage of discovery through the 250 million year old geological history of this mountain range, all the way to the changing tensions of this mountain region as a border area during the First World War. The tour gives you insights and views into the flora, fauna, mountain world and culture of the Dolomites. The pearl of the Dolomites: Lake Misurina

In the morning of the tour you will be picked up in the exclusive executive van directly at the hotel and drive via Dobbiaco to Lake Misurina. The lake is often called the "Pearl of Cadore" by the locals and is a great photo spot.

One of the most beautiful Dolomite passes: The Falzarego Pass

The beautiful pass road then leads you - framed by the Dolomites - first to the Passo Tre Croci at 1,809 m and then to the Falzarego Pass. The latter is framed in the north by the impressive rock towers of the Little Lagazuoi and offers a wonderful view over the surrounding Belluno region. According to local legends, the name of the Falzarego Pass comes from the words "fautzo Rego" - Ladin for "false king". This refers to a king who betrayed his people and whose petrified figure can still be seen in the rock faces of the Little Lagazuoi.
